KEEPS OUT

PINE NEEDLES

PESTS

ALUMINUM EXTRUSION

Attaches to the front lip of the gutter and holds the mesh securely in place for superior strength.

ADVANCED TROUGH TECHNOLOGY

The latest advancement in gutter guard technology provides maximum filtration and ensures water flows into your gutter, not over it.

STAINLESS STEEL MICRO-MESH

Mesh won't warp or crack like plastic or uPVC & blocks even the finest debris.

PATENTED Z-BEND TECHNOLOGY

Raised Z-Bend lifts debris off of the mesh and creates rigidity across the width of the gutter.

GOOD FOR THE ENVIRONMENT

Many gutter guard products use plastic or PVC, which are harmful to the environment. LeafBlaster Pro® is made from aluminum and stainless steel, both of which are 100% recyclable.

Our gutter guard also received Certificate of Compliance for rainwater harvesting.

In accordance with NSF P151 and NSF 372 (NSF/ANSI 61).

Leafblaster Pro® is made with materials that stand the test of time.
